

## FER-NB1118

### FERNO NAJO RediHold® w/18 pins

The NAJO® RediHold is our top-of-the-line backboard with two handles at a tapered end to allow for more stable transport. The head area is smooth to insure all head immobilization devices adhere to the board and the edges are angled for log-rolling. Strong, lightweight, one-piece HDPE construction is impervious to all bodily fluids, is easy to

decontaminate, and provides 100% x-ray translucency. This board is also buoyant and can be used to float a patient in the water. Guaranteed for life under normal usage. Standard colors are; red, orange, yellow, green, and blue. All other colors may require a minimum quantity for purchase.

## FER-NB3318

### FERNO NAJO RediBoard® w/18 pins

The NAJO® RediBoard is our most popular backboard and does not have a designated front, back, top or bottom so the patient can be positioned and immobilized faster. Strong, lightweight, one-piece HDPE construction is impervious to all bodily fluids, is easy to decontaminate, and provides 100%

x-ray translucency. This board is also buoyant and can be used to float a patient in the water. Guaranteed for life under normal usage. Standard colors are; red, orange, yellow, green, and blue. All other colors may require a minimum quantity for purchase.

## FER-IE8000

### FERNO Millennia™ Boards – 16"

The Millennia™ Plastic Backboard's design provides maneuverability in close confinement. Its contoured shape with easy-slide features allows for efficient and smooth patient movement. Due to its lightweight, innovative construction, the Millennia has a 350-pound load capacity. The

Millennia is made of a foam-filled construction and contains five pairs of X-ray translucent polycarbonate speed clip pins which are offset for various strapping configurations. Millennia Backboards are X-ray translucent, easy to clean and can be used for water rescue.

## FERNO Model 71 Basket Stretcher

Constructed of a high-density polyethylene shell supported by a permanently attached, heavy-duty, aluminum frame. Molded-in runners and handholds make it easy to handle. Chemical, UV, rust, and corrosion resistant. Brass grommets are strategically located for quick use with Model 418-1 Adjustable Lifting

Bridle. Tag lines should always be used when lifting the basket stretcher. Easily replaceable closed-cell foam pad is attached inside the stretcher for patient comfort. Four two-piece 5' quick-release patient restraints are simple to use and permit the rescuers to easily change the position of the straps to fit each patient.

**FER-PT7100**

## FERNO Advantage Plastic Basket Stretcher

The ADVANTAGE is a completely redesigned stretcher and is unique among the high density polyethylene exterior basket stretchers on the market today.

The fully-internal stainless steel frame provides a 2500 lb. strength rating while giving a single-plane sliding surface on the bottom. The outer high density polyethylene (HDPE) shell is attached to the top tube, allowing the secondary rail to be completely exposed to provide full options for tying in your patient for the most technical rescue.

Generous cut-out sections in the shell provide numerous sections of exposed top rail for handling, and the 7/8" tubing allows for a more comfortable grip.

The patient pad is made of closed-cell foam that will not allow fluids to soak into it, and is able to withstand even the harshest cleaning agents. It is glued in such a manner that it can be removed and replaced if required. Standard on the ADVANTAGE is our patented StratLoad attachment points.

**FER-RR1125**

## FERNO Universal Head Immobilizer

Simple to use, lightweight and easy to clean. Composed of two plastic-coated, closed-cell foam head supports, a universal attachment base and two durable head straps. Base

plate fits all Ferno wooden, aluminum and plastic backboards. Head supports can be used on standard backboards, or turned around for use on the Scoop Stretcher.

**FER-IE4450**

**FER-IE4490**

**FERNO  
Wizloc® Cervical Collar**

There is no substitute for a properly fitted cervical collar. The universal design of the WizLoc provides a collar capable of fitting 90% of all patients. With its 3-step adjustment, application is fast regardless of patient position. The unique self-centering mandibular support allows you to custom fit the

WizLoc to the patient. A simple adjustment to the occipital support also accommodates all ends of the sizing spectrum. The WizLoc gives you greater control, greater patient comfort, and a better fit, which means safer conditions for the patient.

**FER-RS7700**

**FERNO  
Fastrap™ Quick Restraint System**

The Ferno Fastrap™ Quick Restraint 10-point, six-strap system is used to quickly secure patients to backboards and other devices. It is designed for easy storage and rapid application in patient immobilization. The color-coded Fastrap is black, red, yellow, green and

gray, sequentially coded. The Fastrap system is constructed of nylon webbing with hook-and-loop closures at the ends of the straps. The Fastrap system is compatible with Ferno backboards and Scoop stretchers. Size is adjustable from adult to pediatric.

**FER-RS7733**

**FERNO  
Two Piece 5' Speed-Clip – Nylon/Polyester**

Two-piece patient restraints made of 2" nylon/polyester webbing with quick-release, automotive-type, coated metal

buckle that resists rust and corrosion, or polypropylene webbing with plastic buckle.

**FER-IE1250**

**FERNO  
K.E.D.® – Kendrick Extrication Device**

The Original Ferno K.E.D. is ideal for extricating and immobilizing patients from auto accidents and other confined spaces. The wrap-around design provides horizontal flexibility for easy application and vertical rigidity for maximum support of the spine, neck, and head during extrication. The K.E.D.® immobilizes the torso, head and neck, enabling prompt extrication

while minimizing risks of further injury. X-rays or advanced life support procedures can be performed with the K.E.D.® in place.

The Ferno K.E.D.® includes wrap-around vest, Adjusta-Pad neck roll, two head straps and a carrying case. Heavy-duty, vinyl-coated nylon is durable and easy to clean and the K.E.D. stores rolled up, ready for immediate use.

**FER-5104**

## **FERNO 5104 Responder Vest**

Ferno's Responder Vests are strong and durable with the storage, convenience and visibility you need on scene. Vests are packed with features including adjustable straps to ensure comfortable fit, reflective stripes on back and front, and a back pocket that holds six reflective assignment tags attachable by Velcro®. YKK® zippers and DuPont® Cordura® construction ensure long life. Machine washable Available in blue and red The 5104 Responder Vest features five large, easily-accessible storage pockets with hook and loop closures.

**FER-MB5113**

## **FERNO First-In Trauma Bag**

Ferno's First-In Trauma Bag is designed for today's tools and today's emergency professionals. The bag features DuPont® Cordura® construction, YKK

zippers, and dual-density, Plastizoted® structural foam for the highest quality and long life. The First-In Trauma Bag is great as personal or first-in kit.

**FER-MB5108**

## **FERNO Professional ALS Bag**

Ferno's Professional ALS Bag is designed for today's tools and today's emergency professionals and can be made into an ALS system with the addition of 4 Mini-Bags. The bag

features DuPont® Cordura® construction, YKK zippers, and dual-density, Plastizoted® structural foam for the highest quality and long life.

**FER-MB5107**

## **FERNO Professional Trauma Bag**

Ferno's Professional Trauma Bag optimizes organization to accommodate the most modern supplies being used by emergency professionals today. The bag features DuPont® Cordura® construction, YKK zippers, and dual-

density, Plastizoted® structural foam for the highest quality and long life. The bag also features a low-profile back to keep the kit close to attendant and a tuck-away backpack harness system.

**FER-MB5110**

**FERNO  
Trauma /Air Management Bag II**

Ferno's Trauma /Air Management Bag II is designed for today's tools and today's emergency professionals. The bag features DuPont® Cordura® construction, YKK zippers, and dual-

density, Plastizoted® structural foam for the highest quality and long life and quick oxygen access through end pocket or from main compartment.

**FER-MB5111**

**FERNO  
Trauma /Air Management Bag III**

Ferno's Trauma /Air Management Bag III is designed for today's tools and today's emergency professionals. The bag features DuPont® Cordura® construction, YKK zippers, and dual-density, Plastizoted® structural foam for

the highest quality and long life. The bag also feature quick oxygen access through the end pocket or from the main compartment which can hold "D" and "Jumbo D" size cylinders.

**PMI-SK-300-OR**

**SKEDCO  
Oregon™ Spine Splint II, OSS II™**

Spinal immobilization/extrication device is the only device of its type available that meets all of the established criteria for immobilizing a seated patient. An ideal companion for the Sked® Stretcher System, when properly used the OSS II provides for safe removal of patients from injury sights without doing further damage to the spine. The unique criss-crossing shoulder strap design provides superior immobilization without restricting breathing and, for clavical fractures, can be reconfigured to retract and immobile the shoulders. The OSS II is designed to provide easy access to the patient's chest or abdominal area for treatment or diagnostic procedures. It can be used in place of a conventional short backboard and as a hip or leg splint. The OSS II includes shoulder board not found in similar devices. It can be used to prevent compression of the shoulders when using a flexible stretcher.

**RBF-201**

**R&B FAB  
Small Trauma Bag (with Luggage Handle)**

Made of heavy Cordura® nylon with two end pockets, padded 2" web shoulder strap, luggage handle, a divider inside with slots for shears, forceps, etc. Five elastic loops on inside flap for oral air-ways. Ideal as a personal trauma bag or for first responders. Main body measures 9" long x 8" high. End pocket measures 8" Long x 3" Wide x 4 1/2" high. 780 cubic inches. Colors: International Orange or Navy with black trim and a white "Star of Life" silkscreened on the top flap.

## R&B FAB Trauma Oxygen Bag (T.O. Bag)

**RBF-820**

This bag is designed to carry your oxygen supplies, a “D” cylinder and trauma related dressings and equipment. There are three main compartments. Overall dimensions are 10" high x 15" wide x 24" long. Silk screened White “Star of Life”

## R&B FAB Urban Rescue Back Pack (Large – A)

**RBF-365A**

9 small pockets, 1 long pocket no oxygen cylinder sleeve. A true rescue back pack with a wide variety of uses from the mountains, to air service, or a squad. Main compartment is fully padded with closed cell foam for protection. All internal pockets are held in place by Velcro® and are removable. The back pack has a web carrying handle and padded contoured shoulder straps, chest strap and waist strap. A false back allows for storage of shoulder straps when not needed. The front outside has a zippered storage compartment 10" W x 15" H x 3" D. On each side is a removable pocket 5" W x 11" H x 2" D. 3M™ Scotchlite™ Reflective Material strips are sewn on three sides. Silk-screened with a white “Star of Life”. Measures 11" W x 20" H x 6" D.

## R&B FAB Mega Trauma Pack

**RBF-375**

This is an extremely large backpack/trauma bag made of Cordura® nylon. The main compartment measures 20" H x 15" W x 7" D, is padded with closed cell foam, and has a #10 YKK heavy duty self repairing nylon zipper. This bag has 16 pockets and compartments. On the outside back is a 15" x 8" gusset pocket and a 15" x 10" x 3" zippered pocket. The two side pockets and top pocket each measure 15" x 5" x 2 1/2". The inside consists of 4 removable flat pockets, 4 pouch pockets and 2 flap pockets. The main compartment has sewn in Velcro® straps for securing contents. This pack has a web carrying handle contoured shoulder strap with chest and waist straps. A false back allows for storage of shoulder straps when not needed. 3M™ Scotchlite™ Reflective Material “Star of Life”.

The following options (sold separately) may be used with the Mega Pack:  
IV starter and hanger, Intubation Kit, Injectable Meds Kit, Accessory pockets, Oxygen cylinder sleeve, Clear pockets.

**SQWINCHER****DENTEC  
Sqwincher**

Sqwincher, the Activity Drink, is a great tasting, scientifically formulated electrolyte replacement drink designed to restore important mineral salts and fluids lost through dehydration, physical exertion and heat stress.

**ZOL-101011010****ZOLL  
AED Plus®**

First and Only Full-Rescue AED

ZOLL's AED Plus® features Real CPR Help™, a tool that is able to actually see what you are doing and provide feedback to help you do it well. Audio and visual prompts help you rescue with confidence and clarity unmatched by any other automated external defibrillator (AED).

Not pushing hard enough? It will tell you when to push harder.  
 Pushing hard enough? It will say, "Good compressions."  
 Not pushing fast enough? A metronome will lead you to the right rate.  
 It will even show you the depth of each compression. In real time.  
 Not yet started? The AED Plus will tell you again to get started.  
 Compressions stopped? It will tell you to continue.  
 ZOLL believes an AED should not just deliver a shock. It should also help the rescuer provide high-quality cardiopulmonary resuscitation (CPR). That's why you need ZOLL's AED Plus with Real CPR Help.

**The AED Plus offers:**

Support for the complete Chain of Survival.  
 Real CPR Help for rate and depth of compressions.  
 Help to all victims of SCA, even those for which no shock is advised.  
 A one-piece pad for fast accurate placement of electrodes.  
 Consumer lithium camera batteries available from retail stores.

**Other important features:**

Intelligent Pediatric Capability.  
 ZOLL's Rectilinear Biphasic™ Waveform.  
 Total AED Program Management with En-Pro.

## AED PRO

### ZOLL AED Pro

#### One Tough Defibrillator. For One Tough Job.

Whether in hospital or in the field, the new ZOLL AED Pro® is designed to perform in any environment. The AED Pro provides the ruggedness, portability, and advanced functionality that professional rescuers and services require from an AED.

#### The Most Rugged, Full-featured AED for Professional Rescuers

Designed with advanced capabilities, the ZOLL AED Pro supports Basic Life Support as well as Advanced Life Support professionals. A high-resolution LCD display allows responders to visualize a patient's ECG while utilizing a 3-lead monitoring cable.

Unique to ZOLL AEDs is a real-time feedback mechanism, known as Real CPR Help™, which allows rescuers to see and hear how well they are performing the rate and depth of chest compressions during CPR.

#### Superior design and rubber over-molds are built to withstand harsh environments.

Exceptionally resistant to dust and water jets (IP55 Rating\*).

Only AED in the industry to withstand a 1.5-meter drop test, making it suitable to withstand the rough treatment typically found in EMS.

Available as semi-automatic with manual override or semi-automatic only.

Built-in 7-hour memory or USB memory technology allows virtually unlimited data storage capacity, and maximum flexibility for data management and transfer.

Electrodes and batteries compatible with ZOLL M Series™ professional defibrillators.

ECG monitoring with 3-lead cable and high-quality display.

Manual override option satisfies Advanced Life Support professionals.

Unrivalled battery compatibility and options (long-life disposable or rechargeable) that meet your specific needs.

Internal or USB memory data storage.

Rate and depth feedback on CPR chest compressions ZOLL's unique one-piece CPR-D • padz™.

- Interior/exterior polymer system provides superior anti-sticking properties
- Extended length provides superior protection in high-risk conditions
- Available in sizes up to XXXL
- Meets or exceeds the emergency medical glove requirements of NFPA 1999

# INTRODUCING THE AIR-PAK X3

GET READY.

**NEW SCBA STANDARDS ARE COMING. SCOTT SAFETY IS READY.**

2013 NFPA standards will be here this summer. Scott Safety is ready with the new Air-Pak X3. You've challenged us to deliver clear fireground communications, increased levels of protection and a more streamlined Air-Pak. And with the Air-Pak X3, AV-3000 HT facepiece and EPIC 3 Voice Amplifier, we've once again delivered, with real breakthroughs in comfort, durability and communications.
