- Custom sizes and designs available

##### Aluminum:

- 1" x 1" x 1/8" 6061 Square Tube Aluminum
- Superior heavy duty laser cut hinge design
- 20-25% weight savings over steel
- Pinch-free design – Read more.
- Aluminum mig welded construction, guaranteed!
- Will not rust!
- Our hinge design allows for aluminum frames to fold down to 7 1/2"

**Husky® port-a-tank liners** are designed with no bulky corners full of excess material that you don't need. Our patent-pending manufacturing process allows us to use one continuous piece of heavy duty 22 oz. vinyl for the side panel, which is then welded to our Husky® duty 30 oz. floor material. Combined with our patent-pending "Easy Lift Handles" welded to the liner floor, Husky's® frame tank liners are the most durable and easiest to use on the market today.

- Available in NSF-61 approved (suitable for potable water)
- Chemical and fuel resistant
- Exclusive, patent pending, heavy duty floor increases the durability of the liner. With our heavy duty acrylic-coated 30 oz. floor material standard, Husky's® folding frame tanks are the most durable on the market. Better than Hypalon!
- Easy Lift Handles, offered only by Husky®, are mounted on the floor of our liners and make pick-up quick and easy
- 10" drain tube with quick release for fast draining or mating with another tank – Two drain tubes are standard on 2500+ gallon tanks
- #4 solid brass grommets
- Double stitched, triple reinforced hems
- Ground and top covers available
- Clear view panel liner (optional) includes a 12" wide heavy-duty, reinforced clear vinyl panel that allows you to easily view water level from any angle
- Optional cinch straps keeps your folding frame tank tightly folded for storage
- 22 oz. Vinyl liners available in red, yellow, blue, orange, green, black, and lime green

## HUSKY PORTABLE CONTAINMENT Skinny™ Tank

### SKINNY TANK

Husky® Portable Containment “Skinny™ Tank” is a folding frame tank with a narrow design. This gives you other options as to where you can set up your dump tank. If you are on a narrow or one lane road for instance, the 8' wide “Skinny™ Tank” allows access for your apparatus to get around the tank and not be forced into the ditch. It also gives better options such as in wooded areas with limited space or even between standing structure

### SELF SUPPORTING FRAMELESS WATER TANKS

## HUSKY PORTABLE CONTAINMENT Self Supporting Water Tanks

HUSKY® Self Supporting Water Tanks are the perfect solution when storage and manpower are a concern. One man set-up frees up personnel, and because these tanks are frameless, there is no assembly required and they are easy to transport and store. Husky® offers low and high side models.

Most common sizes of our low side, self supporting frameless water tanks can be quickly deployed and filled by one person. HUSKY® low side tanks may also be utilized as a dump tank. The heavy-duty foam collar will rise as the water level increases.

- 250-50,000 Gallons
- Low side models are 33" tall when filled
- High side models range from 40" to 96" when filled
- Heavy-duty, self-rising foam collar is standard
- Durable EXLON® material is available
- Durable 30 oz. floor is standard
- 2-1/2" NST female flange is standard
- 1 1/2" – 6" male or female flanges available
- Camlock and Storz adapters available (2 1/2" – 6")
- Ground and top covers are available
- Available in Vinyl, NSF-61 (potable), Chemical & Fuel Resistant and Urethanes
- Storage bag is included
